SUMMARY

Senior Angular Engineer with 7+ years of experience designing and building enterprise-scale Angular applications. Specialized in frontend architecture, scalable UI systems, and high-performance single-page applications using Angular (2–18), TypeScript, RxJS, and NgRx. Proven experience leading Angular development across teams, establishing engineering standards, mentoring developers, and delivering production-grade systems in cloud-native environments using AWS and Node.js serverless technologies. Strong background in modular architecture, reusable component libraries, state management, REST API integration, and performance optimization for large-scale web platforms.

EXPERIENCE

ICOMMUNIX, Senior Software Engineer

Aug 2023 - Mar 2026

Architected scalable Angular 15+ applications using modular architecture patterns. Designed reusable UI component libraries improving development efficiency and consistency. Integrated frontend systems with REST APIs and serverless Node.js AWS Lambda services. Implemented secure authentication systems using Amazon Cognito. Built AI-powered conversational assistant features integrated into Angular applications. Implemented cloud deployments using AWS S3, CloudFront, and CI/CD automation. Established engineering standards for code quality, performance, and maintainability. Mentored junior engineers and participated in technical architecture planning. Implemented monitoring using AWS CloudWatch.

TenX, Software Engineer

Apr 2022 - Aug 2023

Built complex Angular dashboards with reactive programming using RxJS. Migrated legacy AngularJS systems to modern Angular architecture. Developed reusable UI components using PrimeNG and ngx-translate. Collaborated with backend teams for optimized REST API integrations. Introduced modular application architecture and reusable UI patterns. Participated in code reviews and enforced frontend best practices.

3S Solutions Pvt Ltd, Software Engineer

Jun 2021 - Mar 2022

Developed reusable Angular UI components following accessibility and performance best practices. Integrated REST APIs for seamless frontend-backend communication. Implemented lazy loading and performance optimizations for SPA applications. Translated complex business workflows into maintainable frontend architecture. Contributed to engineering improvements through code reviews and refactoring.

TechnoCares, Software Engineer

Jan 2019 - Jun 2021

Developed Angular-based enterprise platforms for automotive, insurance, and real estate systems. Built workflow-driven UI modules and dynamic form systems. Designed frontend modules for service center automation and QA processes. Collaborated with cross-functional teams including product, backend, and QA. Maintained and enhanced Angular applications focusing on performance and usability.

EDUCATION

Virtual University of Pakistan

BS • Computer Science

LICENSES & CERTIFICATIONS

AWS Certified Cloud Practitioner

Issued Jan 2024

SKILLS

Frontend Architecture: Angular (2–18), TypeScript, RxJS, NgRx, Micro-frontend concepts, SPA architecture • UI Frameworks: PrimeNG, Angular Material, Component Libraries, Responsive UI systems • Backend & APIs: Node.js, REST APIs, API design, integration patterns • Cloud & DevOps: AWS (Lambda, S3, CloudFront, Cognito, SSM, CloudWatch), CI/CD pipelines • Engineering Practices: Modular Architecture, Performance Optimization, Scalable UI Systems, Code Reviews, Agile Development, Clean Architecture
